**Victor M. Sidorenkov<sup>3</sup>**

*Candidate of Agricultural Sciences*

**Abstract.** *The present review article dwells upon the key stages of the evolution of approaches towards forest zoning as well as the theoretical and practical aspects of forest economic zoning of the Russian Federation. The authors are offering key strategies to improve the methodological toolkit of forest economic zoning to focus on the economic component thereof and the best zoning practices based on the intensity of forest development.*

**Key words:** zoning, forest and vegetation zoning, forest economic zoning, silviculture zoning, intensity of forest development.
